PRESS RELEASE
FOR IMMEDIATE RELEASE

August 3, 2015

STAGE I DROUGHT ALERT FOR BEACON, NY

As a result of the lack of significant rain fall over the spring and summer, the City's reservoir levels are at the point where our Emergency Action Plan calls for enacting Stage I of our Drought Alert Procedures. We are asking those who use the City's water system to conserve water through the following methods:

- Using a car wash to wash your car, not washing it with a hose.
- Refrain from watering your lawn; lawns will go dormant if not watered and return when moisture returns.
- Refrain from washing streets, sidewalks, driveways or exteriors of structures with a hose.
- Fix leaks.

Please use your better judgment to conserve this vital resource.

Click here for a complete list of [Stage I: Draught Alert requirements](#).

Thank you for conserving!

For additional information, please contact the City Administrator, Anthony Ruggiero at 845.838.5010 or cityofbeacon@cityofbeacon.org.
