

Summer is coming.....

July 9-13

EARTH'S CRITTERS

We share this planet with a plethora of critters - from the terrestrial ones to the ones that are airborne. Some are familiar to us and have parts we 'get'. Some... not so much! This is a week of critter exploration. Hold onto your hats - there'll be animal shows and animal hunts to delight, amaze and educate.

July 16-20

TRY IT!

Every day this week will begin with an amazing science experiment. Activities throughout the week will encourage the importance of trying new things - from sassafras to slackline, from weaving to snake-holding.

July 23-27

ALL THE WOODS A STAGE

It takes a village to put on a show! Sets need to be built, costumes created, lines learned and songs sweetly sung. Get ready for a REAL SHOW!

July 30-August 3 **SEE THE FOREST THROUGH THE TREES**

What exactly goes ON in the woods? Find homes, trails (make 'em and follow 'em), beds, tracks and scat for a week filled with forest fun. Hikes included!

August 6-10

MOUNTAIN OLYMPICS

We've got cozy games and intense games, low ropes and tall tales, team building and team training, and everyone tries everything! The last day will be a great exposition of skills and frills.

..... **Registration begins in March**
